## SCHOOL REPORT.

---

The school committee respectfully submit the following report to the citizens of Candia.

It will be seen by referring to the statistical tables that we have had ten schools in the Spring and Fall, and four terms of ten weeks each in the Winter.

We wish to express to the citizens of the town our appreciation of their increased interest in education by the larger appropriation of money for school purposes and through the generous appropriation of the town, we can refer with pleasure to improvements made on several of the school-houses during the past few years. It is hoped we can say in the near future that we take pride in our school buildings throughout the town.

Your committee have tried to be faithful and prudent in the use of these funds.

It has been the aim of the school board to place in the schools teachers of high moral purpose and ability, for imparting instruction, and it gives us pleasure to report that we have had the services of a corps of teachers of more than average efficiency as a whole; it is no disparagement to any to say that a number have reached a high degree of excellence, and are justly classed in the front ranks of instructors.

It is important that the public should understand of what a good school consists. It is not in the fact alone; that the parents and scholars like the teacher; but the value of a school depends upon how it is taught and governed, the kind of influences operative in it, the intellectual and moral character it is developing. The pupil should be taught to think, be compelled to think accurately and logically. He must acquire the habit of self-reliance, application and concentration. Children should be taught truth, propriety, modesty, politeness, gentleness, kindness, reverence, purity and industry. The best interest of education demands a large amount of work apart from the teachers. Let us remember as are our schools, so are our children; and as our children so will be the

town, the state and the nation. Hence, if our town fails to produce intelligent men and women for the future the fault must rest upon their parents. We cannot raise money for a better or more laudable purpose than to educate our children.

Of the scholars it should be said with few exceptions, that their good behavior is deserving of special mention.

One of the great evils of our school is the lack of punctuality in attendance, an evil to which we earnestly call the attention of all parents and seek their co-operation to overcome. Parents generally have seemed interested to have a good school and have jointly labored to secure the desired results. We feel to thank them for so heartily accepting the new features introduced by the school board and laboring so faithfully to make them a success.

It is with great satisfaction that we are able to say perfect harmony prevailed in all the schools, and there was no complaint either from parents, scholars or teachers.

It gives us much pleasure to see the stars and stripes floating over the school houses of Candia. These flags add dignity to the school building and make the children to realize that they are the children of the great country whose flag floats over them, and that the faithfulness with which they work will help to determine its future prosperity.

We take this opportunity to thank the scholars and friends in South Road District who showed their patriotism and aid in placing the national emblem, with appropriate exercises, over their school house during the spring term.

We sincerely thank the members of the Woman's Relief Corps for their generous gift of a Patriotic Primer for The Little Citizen to each of the ten schools in Candia.

We find in our registers the following names of those who have been punctual in their attendance for one or both terms of school.
